## Top Tips

The secret to success is practising little and often. Use time wisely. Can you practise these Fluency Facts while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

<u>Songs and Chants</u> - You can buy Times Tables CDs or find multiplication songs and chants online. You can also use Education City songs and websites <u>www.timestables.co.uk</u> and <u>www.timestables.me.uk</u>

<u>Use what you already know</u> - If your child knows that  $2 \ge 5 = 10$ , they can use this fact to work out that  $2 \ge 6 = 12$ 

<u>Test the Parent</u> - Your child can make up their own tricky division questions for you e.g. What is 18 divided by **2**? They need to be able to multiply to create these questions.

<u>Use memory tricks</u> - For those hard-to-remember facts, <u>www.multiplication.com</u> has some strange picture stories to help children remember.
